as indicated by the title this book focuses on fundamental problems in finance a logical dilemma in valuation stock valuation methods models risk valuation and optimal capital structure it presents an innovative approach to logic and quantitative reasoning without advanced mathematics that delivers valuable results convincing solutions to these problems readers in finance will definitely be interested in these solutions as well as the methods in fact these fundamental problems are essential in the field of finance and they have remained unsolved or partly unsolved for decades the solutions offered in this book are all sound in theory and feasible in practice and will hopefully benefit both theoretic al research and practical decision making

this book provides innovative solutions to fundamental problems in finance such as the valuation of bond and equity the pricing of debt equity and total asset the determination of optimal capital structure etc which are unsolved or poor solved so far the solutions in this book all have the following features based on essential assumptions in line with reality the final solutions are analytical solutions with closed form models the forms and variables of the models are determined by strict and objective logic processes rather than chosen or presumed subjectively such as the new growth model for stock valuation the new capm accounting for total risk rather than only systematic risk the real solution to optimal capital structure based on the trade off between tax shield and bankruptcy cost in addition these basic solutions or models are adjusted easily to various application scenarios

the primary course for this book is the case course in finance taught to all finance majors at both the mba and undergraduate level this is typically a capstone course at the undergraduate level and either the first or second course at the mba level case problems in finance is a harvard case course that presents real business situations that pose debatable alternative courses of action the cases contain problems that can be narrowed but not always settled by the usual techniques of financial analysis the cases are grouped

by major topics financial analysis and forecasting cost of capital working capital management capital budgeting dividend policy debt policy financial execution and mergers and restructuring
